

I want to thank everyone for attending my WSH class this year. This class is especially interesting for me, as half the class is probably more qualified to be teaching at AU than I am.

As was mentioned in class, R2005 includes some improvements to the Object Model that allow some improvements in the NewScheme script. Please check my website early in the new year for an updated version of this script, as well as some more detailed information on script security, and the Shell Extensions that were briefly mentioned in class.

If you have any questions or comments about the class, the code included here, or any other topic of interest, please e:mail me at [gordon@albedoconsulting.com](mailto:gordon@albedoconsulting.com).

Again, thank you for coming (or just downloading the dataset, if that is the case), and I look forward to seeing some of you again next year.

Best,  
Gordon
